Título: **The emergence of the motherhood premium: recent trends in the motherhood wage gap across the wage distribution**

Autores: Eunhye Kwak

Revista: Review of Economics of the Household

Editorial: Springer Link

Fecha: January 2022

DOI: <https://doi.org/10.1007/s11150-021-09594-3>

[Descárgalo aquí](#)

Resumen:

This paper estimates recent trends in the motherhood wage gap (MWG) across the female wage distribution and explores several drivers of the trend. The result shows that the large convergence of the MWG observed on average is a high-quantile phenomenon. Maternal relative wages sharply increase at the upper wage quantiles in the mid-1990s, leading to a reversed MWG (motherhood premium) since the mid-2000s. This positive selection into motherhood among high-wage women comes from mothers who live with a husband, who have first births in their late ages, and who work for long hours. The MWG has narrowed over time with widening wage dispersion among mothers, and the MWG trend is associated with changing fertility patterns and high-wage mothers' working hours.

Título: **The impact of occupational feminization on the gender wage gap and estimates of wage discrimination**

Autor: Dominica Bartnika, Paul Edward Gabriel, Susanne Schmitz

Revista: Applied Economics Letters

Editorial: Taylor and Francis

Fecha: October 2022

DOI: <https://doi.org/10.1080/13504851.2021.1949429>

[Descárgalo aquí](#)

Resumen:

This study assesses the male-female wage gap across occupational categories ranked by gender density using data from the U.S. Current Population Survey. Our empirical findings suggest a consistent relationship between occupational feminization and the gender wage gap: female-dominated occupations have the lowest average earnings for men and women, whereas male-dominated occupations have the lowest gender wage gap. Gender-neutral occupations have the highest male and female wages, the largest gender wage gap, and the lowest estimated levels of wage discrimination.

Título: **Sexual objectification of women in media and the gender wage gap: does exposure to objectifying pictures lower the reservation wage?**

Autores: Fredrik Carlsson, Mitesh Kataria, Elina Lampi
Revista: Journal of Behavioral and Experimental Economics

Editorial: Elsevier

Fecha: February, 2024

DOI: <https://doi.org/10.1016/j.socec.2023.102157>

[Descárgalo aquí](#)

Resumen:

Using an online experiment, we investigate the influence of sexual objectification in media on reservation wages. In the experiment, subjects (843 women and 307 men in the main analysis) are asked to evaluate advertisements in women's magazines. In the treatment groups, the ads portray women in sexually objectifying poses, while the poses are neutral in the control group. The main research hypothesis is that sexual objectification tends to make women self-objectify, i.e., they internalize the view of the objectifying images, and as a result, they lower their reservation wage. We find that women in the treatment groups do self-objectify: Women who were exposed to the objectifying images described themselves with words related to body shape or size significantly more often than women in the control group. Adding a warning text about the fact that photoshopped images can create unrealistic body ideals did not mitigate the self-objectification. However, we do not find any effect of sexual objectification on women's reservation wages. If we take the results at face value, they do suggest that the objectification of women in media, while having important psychological and emotional effects, does not seem to affect women's reservation wages, at least not directly.

Título: **Are women doing it for themselves? female managers and the gender wage gap**

Autor: Nikolaos Theodoropoulos, John Forth, Alex Bryson

Revista: Oxford Bulletin of Economics and Statistics

Editorial: Wiley

Fecha: June, 2022

DOI: <https://doi.org/10.1111/obes.12509>

[Descárgalo aquí](#)

Resumen:

Using linked employer-employee data for Britain, we find a robust association between the share of female managers in the workplace and the size of the gender wage gap. In workplace fixed-effects estimates, the gap is eradicated when more than 60% of workplace managers are women, a scenario that obtains in around one fifth of all workplaces. The association between the share of female managers and the gender wage gap is more pronounced when workplace managers set pay at the workplace, and where employees are paid for performance. These findings are consistent with the proposition that women are more likely to be paid equitably when managers have discretion in the way they set pay or reward performance and those managers are women. They suggest that a stronger presence of women in managerial positions can help tackle the gender wage gap.

ECONOMÍA Y FINANZAS

China and the WTO a 20-year assessment, world trade forum

Henry Gao; Damian Raess; Ka Zeng

Cambridge University, 2023

[Más información aquí](#)

Resumen:

Examining the twenty years since China acceded to the World Trade Organization, this collection provides an original, systematic assessment of the opportunities and challenges that China has presented to the WTO. Offering in-depth analyses of the 'two-way' relationship between China and the WTO, the contributions explore a range of key issues from the varied effects of WTO membership for China and the global economy to the responses of the WTO members to China's rapid economic growth. It presents diverse perspectives of leading scholars from multiple disciplines, including law, economics, political science, and international relations, as well as practical insights from senior policymakers from both China and the United States. This is an invaluable contribution to ongoing debates about the implications of the rise of China for global economic governance and enriches discussions of the wide-ranging implications of China's growing integration into the multilateral trading system, both now and in the future. This title is also available as Open Access on Cambridge Core. Provides a comprehensive analysis of China and the WTO from a multidisciplinary perspective. Includes contributions from leading scholars and policymakers critically analysing the implications of China's WTO membership. Outlines China's previous interactions with the WTO and offers policy suggestions for how to liaise with China in the future. Available as Open Access on Cambridge Core.

The economic and financial impacts of the covid-19 crisis around the world expect the unexpected

Allen N. Berger; Mustafa U. Karakaplan; Raluca A. Roman

Routledge, 2023

[Más información aquí](#)

Resumen:

The Economic and Financial Impacts of the COVID-19 Crisis Around the World: Expect the Unexpected provides an informed, research-based in-depth understanding of the COVID-19 crisis, its impacts on households, nonfinancial firms, banks, and financial market participants, and the effectiveness of the reactions of governments and policymakers in the United States and around the world. It provides reflections and perspectives on the social costs and benefits of various policies undertaken and a toolkit of preventive measures to deal with crises beyond the COVID-19 crisis. Authors Allen N. Berger, Mustafa U. Karakaplan, and Raluca A. Roman apply their expertise to the research and data on the COVID-19 economic crisis as well as draw on their own rich research experience. They take a holistic approach that compares and contrasts this crisis with other economic and financial crises and assesses economic and financial behavior and government policies in the booms before crises and the aftermaths following them, as well as the crises themselves. They do all this with a keen eye on "Expecting the Unexpected" future crises, and policies that might anticipate them and provide better outcomes for society.

Global economy and world order in the post-Covid-19 era

Zhao Jianying

Routledge, 2023

[Más información aquí](#)

Resumen:

This volume is jointly written by twenty experts and scholars from China. It aims to reflect and answer at least two kinds of questions from historical experience and academic perspective. First, how to view the world in the post-pandemic era? Second, how to view China in the post-pandemic era? From the perspective of macroeconomics and international relations, the book discusses in detail the trend of economic globalization, the risk of global economic recession, the industrial chain affected by the COVID-19 pandemic, the world order in the post-pandemic era, global governance, and relations between and among major world powers. This book presents Chinese scholars' in-depth and timely reflections on the international pattern of the post-pandemic era. It will be a great read for students and scholars of international relations, East Asian studies, and those interested in the world economy in general.

Monetary policy and its unintended consequences

Raghuram Rajan

MIT, 2023

[Más información aquí](#)

Resumen:

A call for an end to aggressive monetary policy and a return to smart growth from an eminent researcher and former central banker. Central banks took extraordinary measures to stabilize markets and enhance growth after the financial crisis of 2008, but without giving much thought to the long-term consequences. It was a response, Raghuram Rajan argues, that set a dangerous precedent: the more central banks did, the more they were expected to do, and the more they ended up doing. Monetary Policy and Its Unintended Consequences looks back at what this meant for where we are now. A former central banker who foresaw the 2008 crisis and wrote a bestselling book about the risks of excessively accommodative monetary policy, Rajan takes a hard look at central bank behavior and its embrace of increasingly aggressive strategies to keep economies afloat. Despite efforts to strengthen markets, the 2020 pandemic showed economies remain as vulnerable as ever to adverse shocks, prompting large-scale interventions that, in the case of Covid, led to persistent inflation and market volatility...

Ranking nations the value of indicators and indices?

Stephen Morse

Edward Elgar, 2023

[Más información aquí](#)

Resumen:

This engaging book assesses the statistical need for using particular ranking systems to compare the status of nations. With an overarching focus on human development, environmental performance and corruption, it carefully maps out some of the main processes associated with the ranking of countries. Centrally, Stephen Morse explores challenges associated with using index-based rankings for countries. Examining international ranking systems such as the Human Development Index and Corruption Perception Index, the book considers what they tell us about the world and whether there may be alternatives to these ranking techniques. It provides an important contemporary view on ranking systems by analysing not only how they are reported by traditional sources of media, but also by social media. Ranking Nations will be a significant read for economics, development studies and human geography researchers and academics. Its accessible written style will also benefit policy actors and decision makers that make use of index-based rankings.

The return of inflation money and capital in the 21st century

Mattick, Paul

Reaktion Books, 2023

[Más información aquí](#)

Resumen:

Both a history and a contemporary analysis, an illuminating investigation of the defining economic concern of our time. The last year has seen the return of inflation as a preoccupation of political decision-makers, economists, and the general public. After two decades of wondering why inflation was so low, despite vast economic stimulus, economists were surprised by the recent surge in price increases. Despite disagreement about what exactly is happening in the economy, there is unanimity in one belief: slowing growth to control inflation. To focus on inflation's return, Paul Mattick looks at both the past and present, placing current events in the context of capitalism's history. Exploring the nature of money itself, he provides a concise, jargon-free understanding of recent inflation as well as official efforts to control it, illuminating the state of our contemporary economy.

Fundamentals of data science theory and practice

Jugal Kalita, Dhruba Bhattacharyya, Swarup Roy

Elsevier, 2023

[Más información aquí](#)

Resumen:

Fundamentals of Data Science: Theory and Practice presents basic and advanced concepts in data science along with real-life applications. The book provides students, researchers and professionals at different levels a good understanding of the concepts of data science, machine learning, data mining and analytics. Users will find the authors' research experiences and achievements in data science applications, along with in-depth discussions on topics that are essential for data science projects, including pre-processing, that is carried out before applying predictive and descriptive data analysis tasks and proximity measures for numeric, categorical and mixed-type data. The book's authors include a systematic presentation of many predictive and descriptive learning algorithms, including recent developments that have successfully handled large datasets with high accuracy. In addition, a number of descriptive learning tasks are included.
